What is Django?

Django is a free and open-source Python web framework that makes it easy to build complex, database-driven websites. It is designed to be secure, scalable, and maintainable.

Django is used by some of the world's largest websites, including The New York Times, Instagram, and Pinterest.

Why use Django?

There are many reasons to use Django, including:

Speed: Django is one of the fastest web frameworks available. It is written in Python, which is a high-performance language. **Security:** Django is very secure. It includes a number of built-in security features,

such as CSRF protection and SQL injection protection. * **Scalability:** Django is scalable. It can handle large amounts of traffic without slowing down. * **Maintainability:** Django is easy to maintain. It is well-documented and has a large community of support.

What will you learn in this book?

This book will teach you everything you need to know to build web APIs with Python and Django. You will learn how to:

- * Set up your development environment
- * Create Django models
- * Write Django views
- * Use Django REST framework
- * Deploy your API

Who is this book for?

This book is for developers who want to learn how to build web APIs with Python and Django. It is assumed that you have some basic knowledge of Python.

About the author

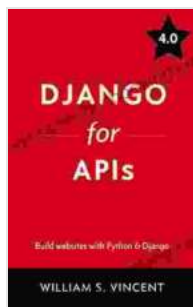

I am a software engineer with over 10 years of experience. I have been using Django for over 5 years. I have written several Django applications, including a REST API for a large e-commerce website.

I am passionate about Django and I love teaching others how to use it. I have written this book to help you learn how to build web APIs with Python and Django.
